

Bibliography of Honeoye Lake Scientific Data

Jack Starke
December 18, 2011

The following bibliography includes the entire set of documents that are referenced in the Honeoye Lake Watershed Management Plan plus numerous other technical documents related to Honeoye Lake. Anyone looking for scientific data on Honeoye Lake should first consult the Honeoye Lake Watershed Management Plan, since it is the best source of summarized data as of October, 2007. More detailed, recent, or historical reports are also included in the bibliography. This includes reports and data related to Honeoye Lake from NYDEC, OCSWCD, OCPD, FLCC, HVA, HLWTF, and others.

The documents in the bibliography are stored in several forms noted in the third column of the bibliography table:

D- Digital documents in native format (MS-Word, PDF, EXCEL, JPEG, PPT, PDF, etc.).

W- Digital documents available from a website; the website URL is listed.

B- Books publicly available from libraries.

S- Scanned images of paper documents. These scanned documents are PDF files and are not editable.

P- Paper document

Blank- Documents referenced in Watershed Management Plan which I do not have in any form.

The importance of some of the documents is color-coded as follows:

Best source of summarized technical data is included in the Honeoye Lake Watershed Management Plan.

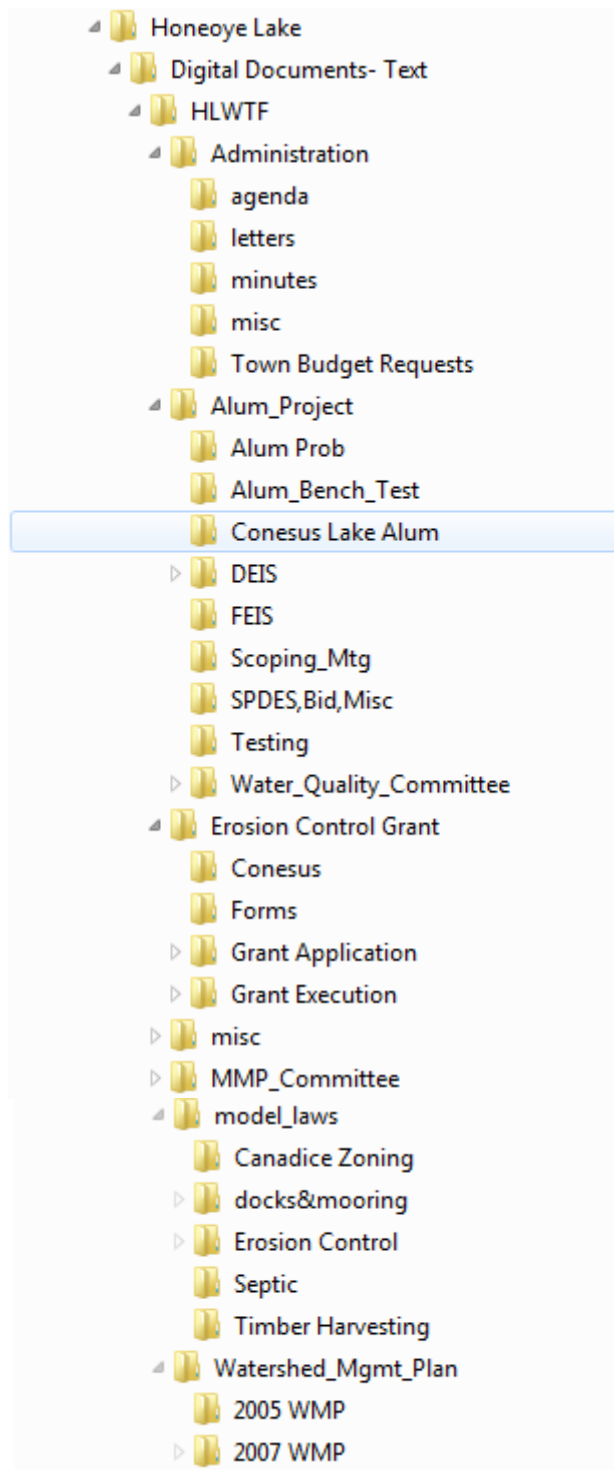

Other important documents, which may be more detailed and/or more recent.

Documents not scanned but the data included in other newer documents.

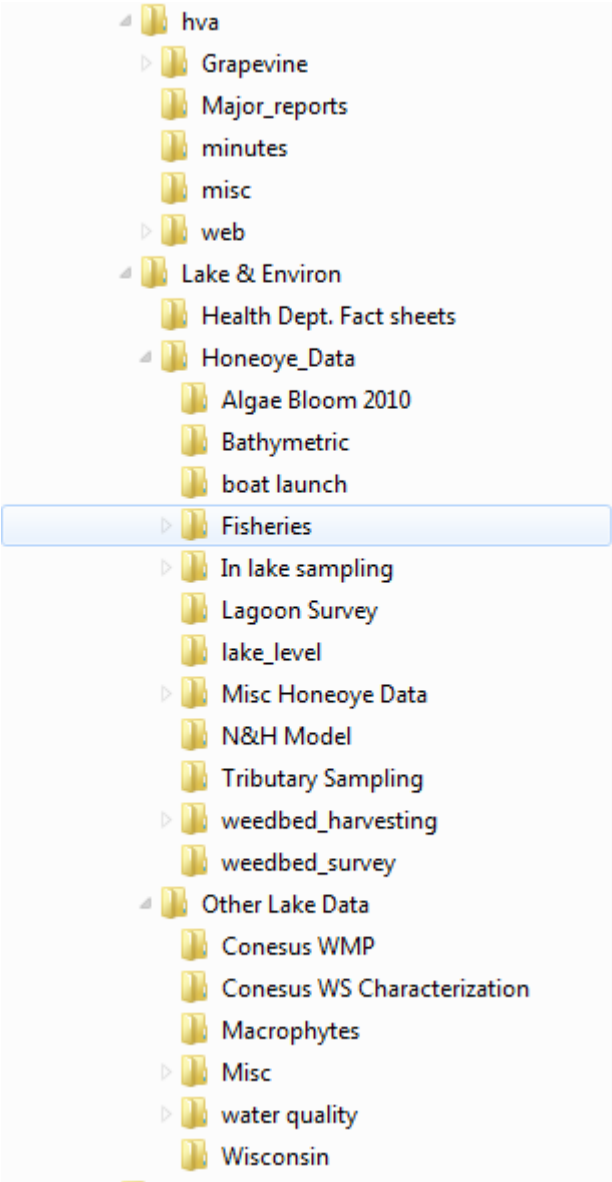

This bibliography document is stored in the highest level of the directory (Honeoye Lake). Since the bibliography is quite large one can do a search on any character string in the bibliography such as words in the title or author name to assist in finding a specific document. Once found in the bibliography, one can do a search on the filename in the file structure stored on the flash drive with all of the archived files. In addition to the documents listed in this bibliography, there are numerous other documents from a variety of sources which that I have collected over the years that have been put onto a flash drive for archival purposes. **One needs to browse the entire directory structure, which contains nearly 1600 files, to determine the total scope of the documents that have been archived, since all documents are not listed in the bibliography on the following pages.**

This bibliography and all documents are stored on a 4 GB flash drive. The flash drive is “read only” so in order to use or change a file it should be copied to ones computer. This archive is stored at Ontario County Planning Department, Ontario County Soil and Water Conservation District, NYS Department of Environmental Conservation and the Honeoye Public Library. Anyone is free to copy documents to their computer from the flash drive available at the Honeoye Public Library. A partially expanded directory structure in which all of the files are stored is shown on the next few pages.

Partially Expanded Directory Structure
