

GENESEE RIVER BASIN TREES FOR TRIBS

A Program of the NYS Department of Environmental Conservation Saratoga Tree Nursery

2016 Tree and Shrub List

The Genesee River Basin Trees for Tribs Program is pleased to offer a variety of tree and shrub species to participants. The majority of our plant stock comes from the NYS Department of Environmental Conservation Saratoga Tree Nursery, with some additional plant stock coming from local private nurseries.

Please let us know if you have any preferences on your plants, such as whether it flowers, has colorful fall foliage, attracts wildlife, etc. We will assess the conditions at your site and try to accommodate your preferences. If there is a species of tree or shrub that you would like, but don't see it on our list, please let us know. We are sometimes able to find additional species.

This list is likely to change throughout the planting season, so please contact the Genesee River Basin Trees for Tribs Coordinator for the most up to date list.
